NANJING MEDICAL UNIVERSITY

## **Recruitment Brochure for “Splendid Jiangsu” International Summer Program of Nanjing Medical University in 2025**

**Theme: Global Health and Medical Humanity**

### **Program Introduction**

In order to further promote the exchanges between Chinese and foreign students, Jiangsu Provincial Department of Education organized the “Splendid Jiangsu” international summer school program which includes two parts: “academic experience” and “cultural experience”. The international summer school program “Global Health and Medical Humanity” of Nanjing Medical University has been approved for obtaining financial aid. This medical program of two weeks includes medical lecture, seminar, on-site learning, etc.

### **School Introduction**

Nanjing Medical University (NMU), listed in national Double First-class University Plan, is one of the first medical colleges co-built by Ministry of Education, National Health Commission and Jiangsu Provincial People’s Government, a high-level public health institute under Ministry of Education, and one to be built into a Class A university under Jiangsu High-level University Construction Peak Plan. The

university tries to “run the school with the door open”, having established various forms of contact and cooperation with governments at all levels, institutions of higher education, scientific research organizations, and social organizations at home and abroad. The university has successively established close strategic cooperation and academic exchange relations with medical universities/colleges and research organizations in the nations like the United States, Russia, Canada, Australia, Sweden and Japan, and regions such as Hong Kong, Macao and Taiwan.
